

4 Types of Learning Styles

Visual

- Learn and retain information that is represented graphically
- Utilizes graphs, charts, maps, diagrams, and other forms of visual organization
- Demonstrations are more effective than verbal instructions

Aural (Auditory)

- Learn and retain information that is presented vocally
- Group verbal collaboration and reading aloud are effective strategies
- Verbal instructions are more effective than written instructions

Reading & Writing

- Learn and retain information using written words
- Utilizes text heavy resources such as presentations, worksheets, and textbooks
- Able to note-take and reference written text strongly in comparison to other sources of information

Kinesthetic

- Learn and retain information that is presented in a physical form
- Learns effectively takes place when hands-on components are used
- Thrives when engaging in sciences/experiments rather than lectures and demonstrations
- More hands-on components

The background is a light beige color with a faint, light brown grid pattern. Two thick, wavy lines, one in a reddish-orange and one in a darker brown, frame the central text. The lines enter from the left and right edges and curve upwards and downwards respectively. A small, stylized orange flourish is located to the right of the text.
